

ANR Site Builder

Where you can make websites to support your office, workgroups, and projects. It is also your access point for the survey tools.

Purpose of the Site Builder system

- Support the use of internet resources across ANR.
- Provide consistent and professional visual look and interface.
- Expand public access to ANR's information resources, programs, and people.
- Expand internal collaboration and communication
- Cost effective website hosting infrastructure.

Logging In Before any sites can be created or managed, you must log into the system. Two primary methods for gaining access to Site Builder exist:

Through the ANR Portal

The easiest way for ANR Personnel to manage a site is through the ANR Portal. Logging into the ANR Portal gives you one-click access to the various systems in use by the division.

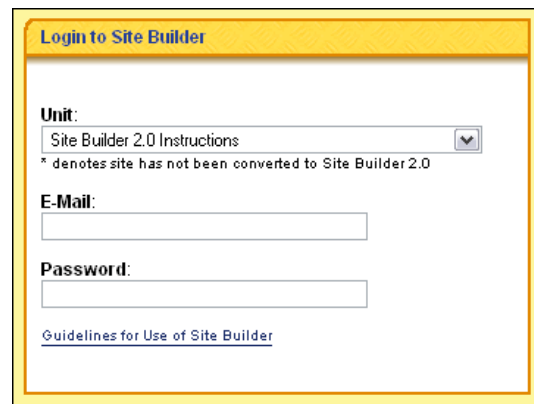

To log into Site Builder through the Portal, simply sign into the Portal, find the site you wish to manage and click "Edit" next to the site's name.

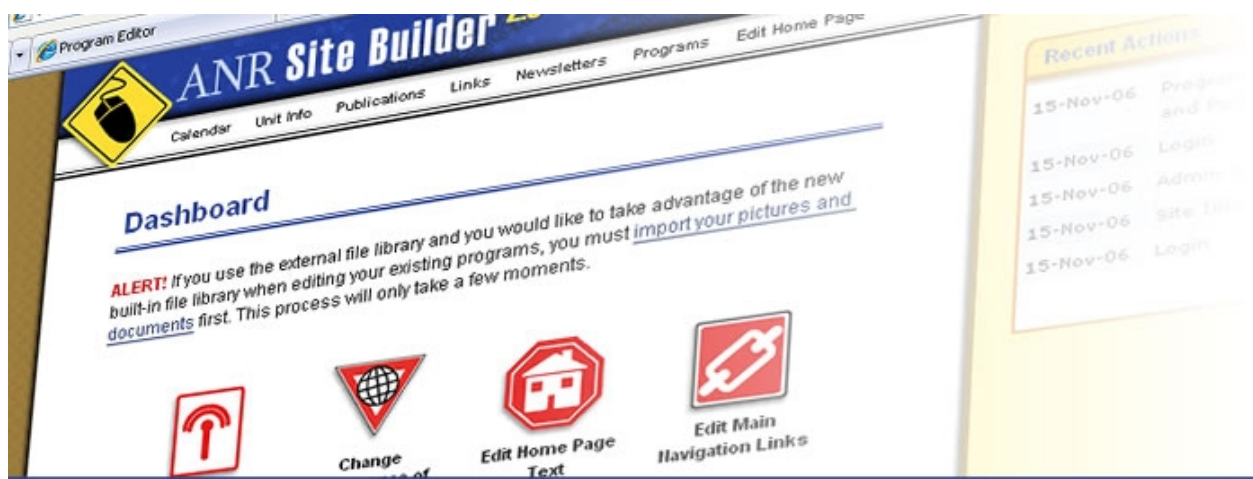

If you have never logged into Site Builder 2.0, and you wish to create a new site, you will find a Site Builder 2.0 link in the section of your portal called "Unused Systems". This link will take you directly to the site creation page.

Through the Site Builder Sign-in Page

If you do not have access to the ANR Portal, you can also access the Site Builder system by going to the sign-in page at <http://ucanr.org/sitebuilder>. On this page, you can also access the Web site creation tool by clicking "Create New Website" at the top right of the page.

(over)

Training is available.
